Mar 18, 2020 Virtual Audio 2, Sound Control, Guitar AE, Auto Volume.. One of the more common problems I see in VST plugins is when an effect is not working as expected. No matter where your source audio comes from, it can be "unbelievably" mangled with the wrong settings on the mixer or algorithm settings. If a plugin is unable to perform the effects that you are used to on your usual source material, you have to look at the documentation and perform proper setups of the settings. Plugins 4.3.2.
