And to get a video loop in just a click. Maya is the 3D animation toolkit. It has a more integrated flow than other animation tools. It's more like the program you would draw your animation. So it has many more tools, most of which are quite easy to use. But there are still some advanced features that you might not be familiar with. 3DMax is the popular 3D animation tool. It has many powerful tools that help you to create a 3D animation in just a few clicks. But it is difficult to learn, you need to learn the basic knowledge and programming first. And it has a very steep learning curve. So in this course, you will learn all about the three animation tools. We will introduce the basic knowledge, then talk about the differences of the three animation tools. Then we will spend a little time to talk about the animation tools, in order to give you a general idea about the work flow in these animation tools. There are many things you need to learn to be a professional animator. But even more to learn an animation tool. These two are very important. Because you need to know the animation tools to practice. And these two are also very important. Because you need to know the animation tools to get hired. If you want to be a great animator. You need to know the animation tools first. Because the animation tools are the way to go for anyone who wants to be a 3D animator. So it's very important to understand the animation tool to be a great animator. If you want to work in the animation industry. You need to know the animation tools first. Because the animation tools are the way to go for anyone who wants to work in the animation industry. At the same time, you will also learn some basic animation skills. It is now widely accepted that the majority of cancers result from aberrations in the signalling pathways controlling cell cycle progression. Importantly, the PI3K/AKT and RAS/RAF/MEK/ERK pathways control both the G1-S phase transition and G1-M phase transition by regulating cyclin D, E, and A activity. In our recent studies, we have also uncovered a novel axis composed of BTG2 (B
