## What's New in the?

DISKSCANNER is a simple, free, lightweight application for viewing files and folders on your hard drive, and its graphical system tray icon can be used to monitor disk space on your computer. The software has all the features you would expect. It can scan all your drives, and display a graphical representation of the hard drive space. Click on any drive or folder in the list to view its details. The detailed information contains available disk space, used disk space, free disk space and used disk free space. This is the perfect tool to manage your drive space. It does not contain any ads, spyware or other undesirable software components. Simply a great tool for everybody. Features: View your drive space View details of the hard drives View details of the folders Details of the subfolders The version number of the disk scanner is always updated with every new release or version, so you can be sure that you are always using the newest version. You can of course install the program to your desktop, and that is the preferred way. Running the program directly from the desktop can be useful for some tasks, and the desktop icon can be removed. But if you want to view the disk space information on the system tray, that's the way to do it. Another advantage of doing so is that the system tray icon can remain in the system tray, which allows it to be used when the desktop is covered by other windows. Disclaimer: This software has absolutely no malware. You must install it directly to your hard drive, and not to any other drive, which is usually a common mistake. License: DISKSCANNER is a freeware application. It's available for personal and commercial use. You can always contact us and we can provide you with license key or ask for donations. The license key is included in the first release. DumpIp (IpDump) is an ip address dump utility. It will dump all the IP addresses contained in a file to stdout. These IP addresses can then be fed to the DumpIpE plugin which will convert all of the IP addresses into a human readable text format. 123Macro Mega (MacroTools) is a complete solution for all your software macro recording needs. With this program, you can record your own custom macros in different editors, databases, spreadsheet and even web pages. It is very user-friendly.
