Category:2009 software Category:Microsoft Windows Category:Windows XP Category:Windows 7Q: jquery javascript character replace I have a string which has a number of tags within it. One of the inner li tags has a class of a, it's value is 'Image'. When the user clicks on the link which was the a tag - ajax submits and the same is replaced. The problem is that all of the a tags have now been changed and the whole table of contents is displayed in a list of tags. I have been trying to get out with the following jquery statement but nothing is working. Could anyone give me a little hand? var content = \$('contentTable li:nth-child(1)').html(); var content = \$('contentTable li:nth-child(2)').html(); var content = \$('contentTable li:nth-child(3)').html(); A: The tag is not the element you are looking for. You need to wrap the li that you want to replace the html of inside a span or a div. Also don't forget that you
