Some applications use the My AutoCAD folder feature to allow the user to locate the program and its plug-in on their system. AutoCAD command names Many of the commands available in AutoCAD can be accessed by using "shortcut keystrokes" in a command-line interface (also known as a CLI), AutoCAD command-line interpreter (AutoLISP or AutoCLI). AutoLISP is a programming language which is interpreted by the AutoCAD command interpreter (AutoLISP). AutoLISP is a framework, similar to the Java API or Visual Basic, that allows developers to create applications which can integrate with AutoCAD and therefore also support a command-line interface, similar to that of AutoLISP. AutoCLI is a command interpreter (CLI) for AutoCAD that consists of a set of command-line drivers which are accessed with a command prompt or terminal, or a script written in AutoLISP, which is the interpreted programming language that AutoLISP is built upon.
