For example, private enum Tasks { GetFile() { //some code }, Run() { //some code } } The Run method is triggered when a user clicks a button. I would like it to change the state of the enum. The problem is that Tasks is a class and the run method I have defined is outside of the class in the global scope. How can I achieve this? A: Just create a method that sets the enum: private enum Tasks { GetFile() { //some code }, Run() { //some code SetState(); } } private void SetState() { //some code Tasks.Run(); } Liverwurst Liverwurst (; ; often referred to just "Liverwurst") is a sausage made with some or all fat from the liver of cattle or pigs, often blended with other meats, 3da54e8ca3
