Peggle 2 has been updated, it's available now in the Steam store for \$19.95. \$19.95. Gameplay... I like it. For a quick match it plays well, and with a few extra seconds I can really customize my character while playing. Between story mode and mission mode it's also fast played and well balanced. The only drawbacks are the lack of playable demos, and the default map selection. And the one map in the FMC skill filter that I can't figure out how to access. Effort: Took me 10 mins to unlock all the characters in Story. That's the biggest waste of time. But all the characters are unlocked now, every challenge is fun and difficult. Weather: This game has seasons and I love it. The graphics make it you can understand the game much better than ME and ME2. The Story: The overall story for was disappointing, but it was funny, and there was finally a bomb plot. The majority of the art and plot is taken from Rocket Hare. And even though Ratchet and Clank is the most popular
